25X1

On 9 October 1955, no construction work was observed at Schlotheim airfield but it appeared as though improvement work had been completed. The runway had an estimated length of 1.5 km. No air activity or aircraft were seen. Some soldiers were observed near 7 large tents and 2 house trailers. A pile of wooden crates presumably for storing ammunition and a truck were seen.

25X1

  Comment. Grading work at Schlotheim airfield was observed for the first time in July 1955. During the same month, runway mats required for covering a 2,000 x 40 meter runway arrived from Brandis. Work on the runway was possibly completed.
